Sagrada Familia Hagonoy Bulacan

PROFILE INFO

MERN Stack Web Developer with hands-on experience in building, debugging, and maintaining responsive web applications. Completed a 250-hour internship focused on real-world development tasks, including frontend implementation and collaborative debugging. Also familiar with PHP, Laravel, and MySQL, with a solid understanding of UI principles, responsive web design, and version control. Passionate about continuous learning and committed to creating user-friendly, efficient, and scalable web solutions.

EDUCATION

BULACAN STATE UNIVERSITY

- Computer Engineering

SKILLS

Languages

- PHP
- JavaScript
- CSS
- HTML

Frontend Frameworks

- ReactJS

Backend Frameworks

- NodeJS
- Laravel

Version Control & Tools

- Git
- Github
- VsCode

Networking

- Cisco Packet Tracer

WORK EXPERIENCE

Planning and Development Office, BSU

MIDYEAR-2025

Intern

- Contributed to the development of internal web applications using the MERN stack, assisting in both frontend (React.js) and backend (Node.js/Express.js) tasks.
- Identified, reported, and resolved bugs to improve system performance and user experience.
- Collaborated with a team of developers and QA officers, participating in code reviews and version control workflows via GitHub.
- Gained hands-on experience in using modern development tools and industry-standard practices in a professional office environment.

PROJECTS

Adoptmepls.com

- A Laravel and MySQL-powered pet adoption platform that allows users to post, browse, and adopt pets. Features include user authentication, real-time chat between adopters and owners, and lastly post filtering by species.
